

A Convenient Way to Build Wealth

AUTOMATIC INVESTMENT PLAN

Ave Maria Mutual Funds Automatic Investment Plan (AIP) can be a great way to accumulate wealth. For many investors, mailing a check on a monthly basis to make additional investments is a hassle. That's where our AIP comes in. It's a smart and easy way to make investing a monthly habit.

With the Ave Maria AIP in place, your investment is automatically deducted from your bank account each month and electronically transferred into any of the Ave Maria Mutual Funds. By investing on a regular basis, you reduce the negative short-term impact of market swings on your account balance and help your portfolio grow. This type of investing, called dollar cost averaging, does not assure a profit or protect against a loss in declining markets. It does allow you to buy more shares when prices are low and less shares when prices are higher. Because such a strategy involves periodic investing, you should consider your financial willingness to continue purchases through periods of low price levels.

A program of regular investing can help you accumulate wealth. Get started today by enrolling in the Ave Maria Mutual Funds AIP.

Automatic Investment Plan enrollment is easy
